

COLORADO BACKFLOW TESTERS

Commercial, multi-family and dedicated irrigation backflows are required by Colorado Law to have annual backflow prevention testing.

Single-family homeowners are also encouraged to have backflow prevention assemblies tested annually.

Find a certified backflow prevention tester from the list below. Ask the tester to show you his or her Colorado backflow assembly tester certificate. Once completed, a copy of the backflow prevention device test and maintenance report must be submitted to alexandera@elcowater.org

This list will be updated periodically.
